

The DigiOmics Synergy

- The understanding that *“the whole is greater than the sum of its parts”* is the essence of the project's motivation.
- The synergy between DigiOmics and different fields of education, training, youth and sport is generated at various levels while the DigiOmics partners work together on value production.
- The strategies to build such synergy are:
 - ✓ Start with communication,
 - ✓ Foster trust and collaboration,
 - ✓ Set group norms intentionally.
